The Company

Sometimes great revolutions start from small changes. eKoala has decided to open its eyes and make more responsible choices, to develop products for children made of unique, alternative and eco-friendly materials.

We believe it is high time to start building a world for our children that truly is a Wonderland.

Imagine that the bottle of water on your desk, the toy in your child's hand, the spoon used for their first meal and the packaging of your dinner could be made with high safety standards, using mostly substance of vegetable origin.

Imagine that objects we usually use only for a minute but remain in our environment for thousands years, could disappear and biodegrade in less time. This is the magic of bioplastic.

eKeat Spring edition

Product dimensions (cm): 27,5x9,5x22 h / Product weight (gr): 546 / Pcs/box: 12 Box dimensions (cm): 32x59,5x51 h / Box weight (kg): 7,5 / NO Dishwasher

eKeat Version 1

eKeat Version 2

eKeat

Let your child discover the happiness and fun of the first baby foods without concern!

eKeat is entirely made of BIOplastic and it does not contain any dangerous substance you could find in many traditional plastics (melamine, BPA, phthalates or other) that, when released into food, could be swallowed by your children.
